

DESIGN PORTFOLIO

CAR-THE CAR FINISH HAD NEEDED TO BE BOLD AND SLEEK A SIMPLE YET ELEGANT WHITE FINISH WITH BLACK AND BLUE AND LEAVING AMPLE SPACE SO WE CAN ALSO PUT THE LOGO TO BE DISPLAYED PROUDLY.

THE BODY OF THE CAR

THE BODY OF THE CAR IS DIVIDED INTO THREE PARTS THE NOSE, THE BOTTOM CAR AND THE BACK PART OF THE CAR

NOSE

THE NOSE IS THE FRONT PART OF THE CAR. THE NOSE OF OUR CAR WE HAVE DESIGNED IT IN SUCH A WAY THAT THE AIR FLOWS SMOOTHLY AWAY. IT ALSO HAS A SPOILER. THE NOSE HAS NO RIGID POINT.

The bottom portion

The bottom portion of the car was made by maverick with a little help from prabhav. The upper conical shape was lofted and the lower

part was filleted and then we did some changes in it like we had extruded it a little bit

The back portion

This was the most difficult part of the car we have made two triangles in it then we filleted it.

Our car has an aerodynamical design .

Down force it is the downward lift of the car created by the aerodynamical design of it.
