Roles

We thought for our roles in the first session where we met. We elected our head as Pratham because of his calm behavior. We were assigned duties by him and then we started to get our work completed on time. We had a research lab in our school where we had all the meetings and gatherings. After each day presented our work to each other and then taking each others opinion on it.

Pratham Singh
Team Head

Harsh Govind
Car Designer

Kavish Gupta
Resource Manager

Yugank Mishra
Graphic Designer

Yash Singh
Marketing Manager

TEAM INTRODUCTION

Team Interactions

Because of all of us being in the same class we had an advantage of it. Because of the roles divided we easily able to complete our work and then also modified it to the best. We also changed our duties some times to get all teammates work on every thing. We did all the things to create the best of our limits

Summary-We told about our team members and all about our interactions.

About Our Nature

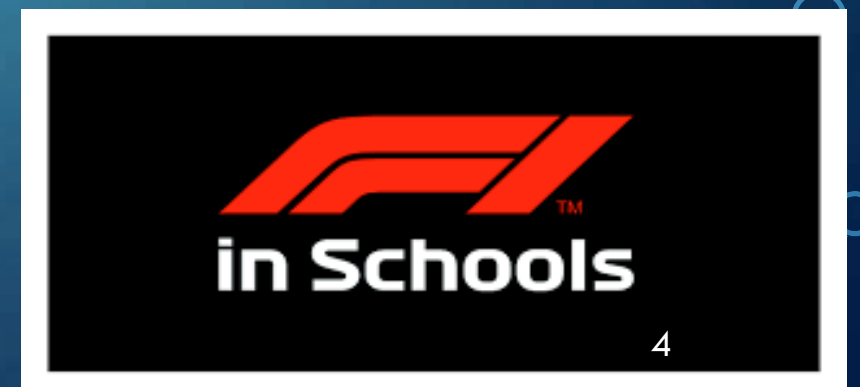

Our team should be known as a team which is very brave and hardworking by our nature everyone should feel that this team is not made by one person their is a team work between members .If this time we fails we will try it next year. But we will ,we will win we will not become sad cause we are brave. We have a lot of good qualities but we have some bad also like while the trials we had to go to another school so our teacher said that we can send only two members so we had a fight but then we solved it by odd-eye.

TEAM GOAL

Our Dream

Our team's dream is to go Singapore and win the finals to make our India proud and our country will be on the top of the list. We want to beat the record of Australia's horizon of the fastest car in this race.

Summery-We told abut our team members and all about our interactions.

SPONSORS

Our Bad Luck

Our luck was not good. We tried a lot but were not able to get any sponsor. We tried with many companies but was not able to get one. I felt the worst one on of the companies said they they'll but at the last moment they changed their mind. We went to stores, sent mails and also talked to their customer executive. We tried with Puma, Nike, MG, Jio and many other companies but they denied. We felt very bad but were not able to do anything.

Summery-We told about our failure in finding the sponsor.

TEAM IDENTITY

Our Name

Our team had its name from our car and also from our age . We took a unique name that no body ever thought of . We thought of many other names (like Titan, Rodrik Riders) but we took Tines Titans . We had our name thought of our age that was tiny we changed it to tines and titans we took because of our cars colour . Like this we had our name and also our graphic designer and our team manager helped a lot in finding a name.

Our Logo

Special thanks to logomaker.com which helped us a lot in making our logo . We designed in with the help of this software and then gave it our own touch-up . We had three to four designs but when we took our parents opinion we choose the current one(Picture given below).We gave it our own colour and then also added a small circle depicting the earth. We got our tagline on internet.

Our Dress

We kept our team dress as our school uniform.

Summery-We had the discussion about our team name , logo and dress. We told how we found our name and why it is like that.

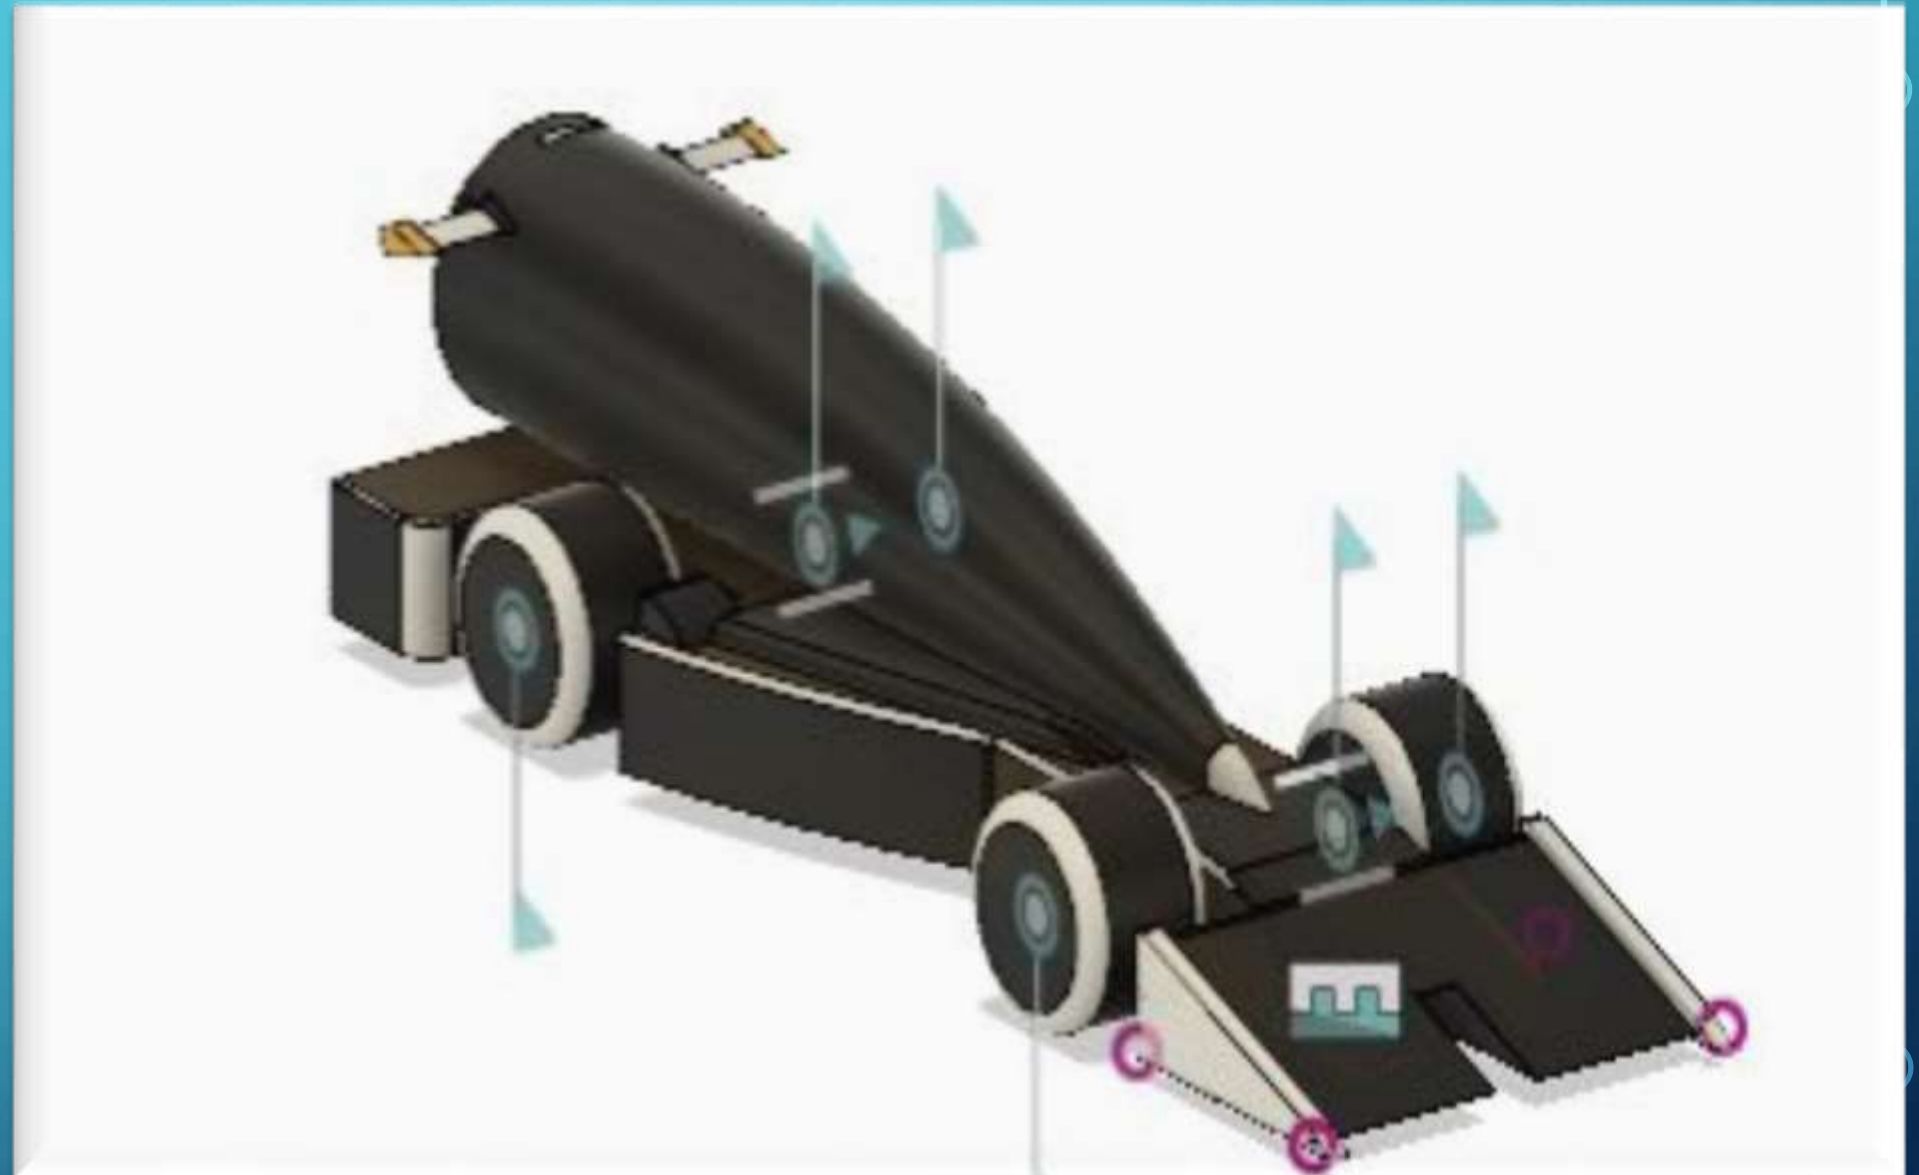

TEAM IDENTITY

Our Car

(I forgot hide the joints , etc.)

Our Designer took its color as black and white cause we had our dress also like this. We added a little of white as our final car was only black but we thought that it would look bad so we added some white. We kept all our fillets white and the rest of the body black as the white part would be its edges and vertices.

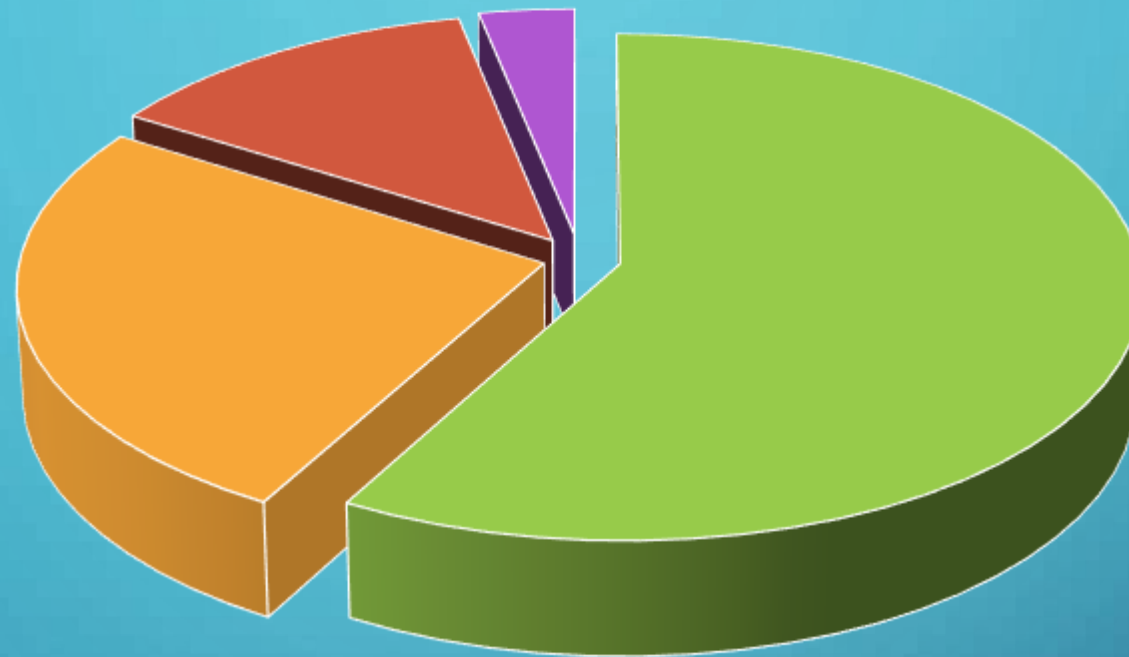

Summery-In this we told about our car design.

in Schools

TIME MANAGEMENT

- **Time Management**

It was the first skill that we learnt from this completion. We had a lot of planning done on the time management. We divided the time of doing things like at school the first 3 weeks we did our car designing while at home did the duties that we were assigned of. We all took out periods and then managed to do our work. We also had a lot of time when we were doing multiple tasks at the same time.

■ Car Design ■ Portfolio ■ Idea Discussion ■ Others

Time Evolution
As we started knowing more about the software we started to do our work faster. We knew how to solve most of the problem other than thinking or asking about it. This helped us a lot managing our time .

Summery-We told about our time management and how this program helped us learn it. We showed the time used through a pie chart.

Ease

COMMUNICATION

Communication is the best process for times titans .It is because it was easy for us to communicate with email, telephone and Whatsapp we communicate in many companies and are school is English medium so we can speak very nice English. We will make friends with communicating on web we will also help others if they have any problem. If any team says us to help them then we will help them We will always help the understand.

Summery-We told about the communication process and the apps which helped us.

in Schools

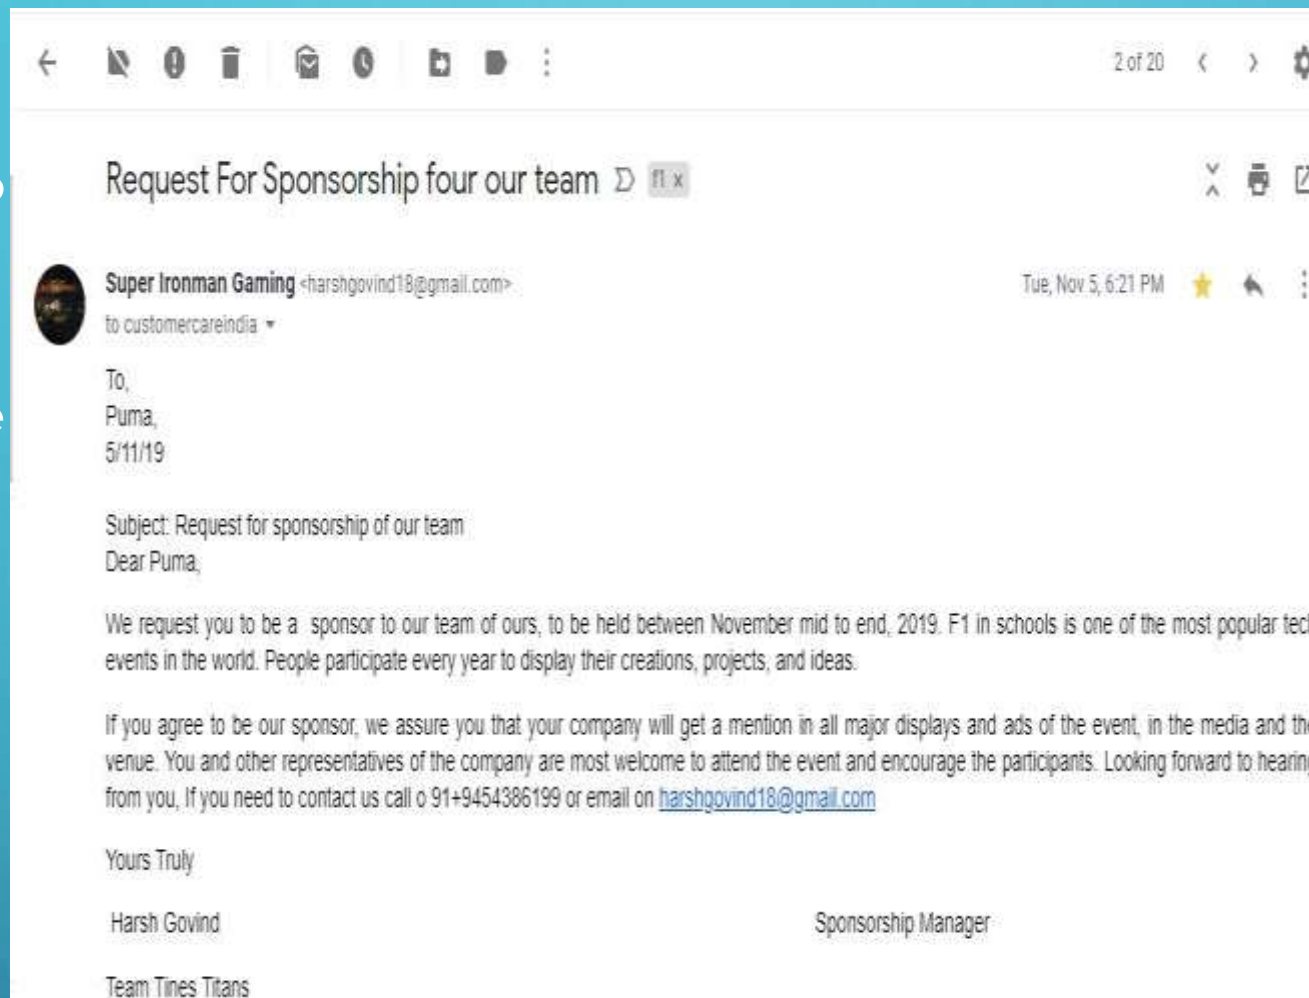

OUR DIFFICULTIES

Our Difficulties

1.

Our difficulties were that-

We were not able to find sponsors because we didn't have any experience and we were just sending emails and going to stores but we were not able to find any of it. We were not happy for it but we had to stop somewhere to write about our difficulties.

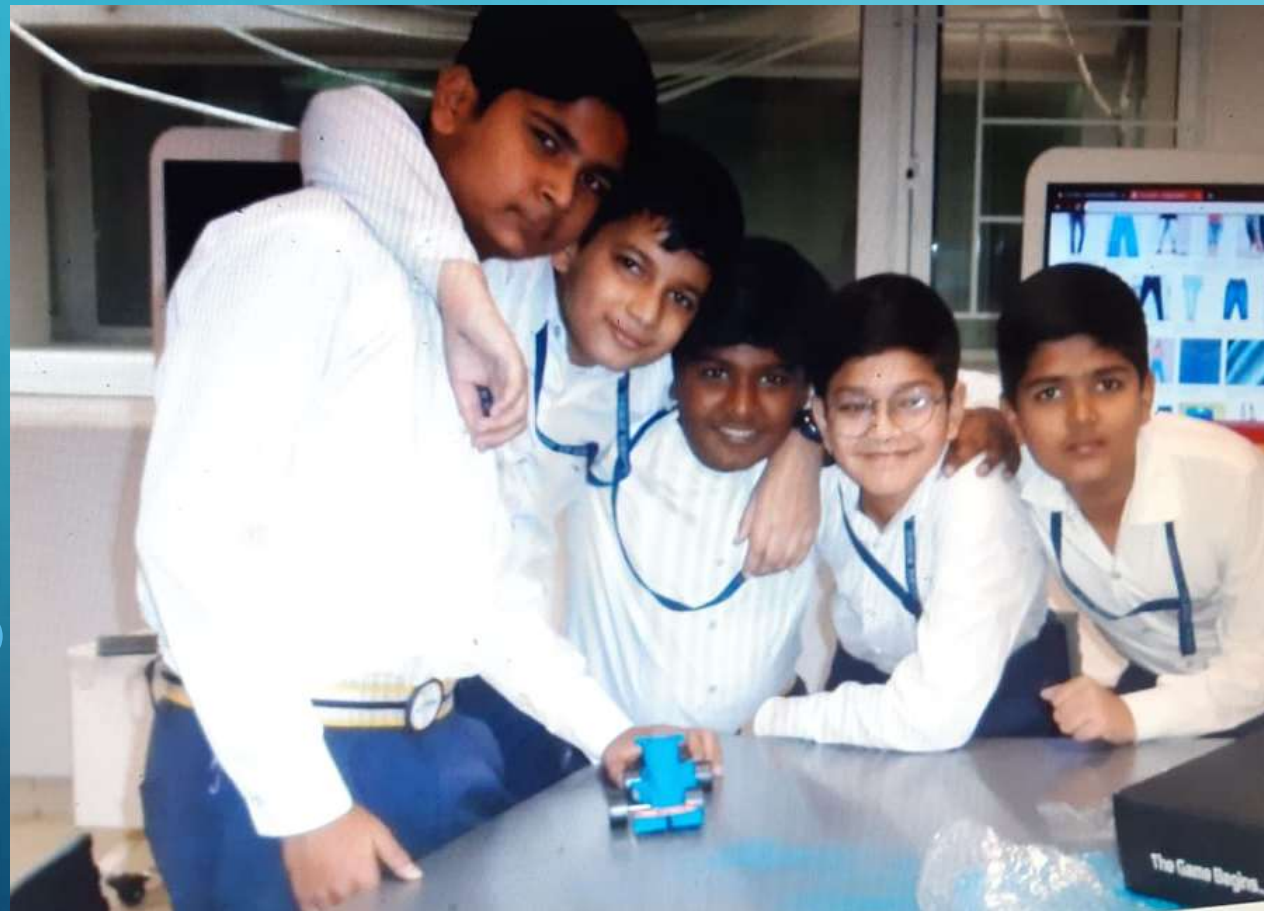

2.

We had a lot of problems finding time to be in our schools research lab and work on our portfolios and also on our car but we solved it by giving it time at home.

Summery-We told about our difficulties and how we solved some.

GALLERY WALK

Summery-We showed some of our videos while working.
